

(Almost) Everything You Need to Know About Scientific Conferences

Dr. Marcus Niechciol (School of Science and Technology, University of Siegen)

When	Tuesday, 30 January 2024, 09:00-13:00
Where	Campus US, Building S, Room US-S 0101 Obergraben 25, 57072 Siegen
Organiser	House of Young Talents
Language	English
Intended for	Doctoral and postdoctoral researchers
HYT-Certificate	Career module (5 AE)

Science is rarely a one-person job, done in solitude up in the metaphorical ivory tower. On the contrary: The exchange with others is an integral part of most scientists' daily lives. Conferences, workshops and meetings provide the perfect opportunity for such an exchange. Here, you can present your research to other scientists and get their feedback, but also learn what others are doing and get to know the current developments in your field and beyond. Also the networking aspect of a conference should not be underestimated: It is not uncommon that the people you meet during the coffee breaks or the conference dinner later become colleagues, collaborators, or even future bosses.

In this workshop, we will cover (almost) everything you need to know...

- before the conference: How do I find the right conference for me? How do I finance the trip? How do I prepare for the conference?
- during the conference: What makes a good talk or poster presentation? How do I handle the Q&A session after my presentation? What are the peculiarities of online conferences?
- after the conference: How do I write up my presentation for publication in the conference proceedings?
